Program Background

This Symposium and Workshop are specifically designed to expose visiting undergraduates to cutting edge translational research being conducted within Baylor College of Medicine, MD Anderson Cancer Center, and the University of Texas Health Sciences Center, and other Texas Medical Center institutions. Outstanding national leaders in translational research are also invited each year as keynote speakers.

The Texas Medical Center (TMC) is the largest Medical Center in the world...

- The TMC is comprised of 49 institutions including 25 government agencies and 24 private not-for-profit health institutions
- 33.8 million gross sq. ft. of patient care, education and research space
- 6 million patients visit the TMC annually
- 18,000 international patients annually
- 93,500 employees
- 20,000 physicians, scientists, researchers and other advanced degree professionals in life sciences.
- 71,500 students which includes more than 5,600 international students
- \$1.2 billion dedicated to patient care for individuals with limited or no resources
- \$1.8 billion in annual research expenditures from TMC member institutions
