HRTP: A PUBLIC HEALTH INTERNSHIP PROGRAM

*Training future generations of public
health professionals*

THE NEW YORK CITY
DEPARTMENT OF HEALTH AND
MENTAL HYGIENE

H RTP: A PUBLIC HEALTH INTERNSHIP PROGRAM

H RTP at the New York City Department of Health and Mental Hygiene (DOHMH) is one of the oldest and largest local public health traineeships in the country!

For almost 50 years, students have had the opportunity to experience some of the "real life" challenges of public health and apply classroom learning to practical problems.

H RTP interns are assigned to nearly every division of the DOHMH, including Disease Control, Epidemiology, Environmental Health, Financial and Strategic Management, Health Care Access and Improvement, Health Promotion and Disease Prevention, Mental Hygiene, and the Office of the Commissioner.

"Through H RTP, I gained valuable experience in grant writing, computer skills, and research. I also met with a number of professionals from various fields who provided me with invaluable career advice. A great deal of attention is paid to placing students with appropriate projects and to finding relevant and topical speakers for the lectures."

-Michele M., Former H RTP Intern
Columbia University

Goals of the Program:

- To orient students to the principles and practices of public health planning, policy, research, administration, and evaluation.
- To broaden students' concept of public health by increasing their awareness of the needs, challenges, and career opportunities in the field.
- To assist the DOHMH in recruiting skilled, professional candidates with proven potential.

Interns:

- Work on current public health problems under the close supervision and mentorship of experienced public health professionals.
- Attend skill-building workshops.
- Have an opportunity to ask questions and learn about cutting-edge research and policy issues.
- Submit a final report of their work, written under the guidance of their preceptor. These reports provide important contributions to the Department's public health programs and public health research agenda, many of these are the found worthy of publication.
- **In the summer:**
 - Attend weekly knowledge-based seminars given by top agency staff and researchers.
 - Meet and network with students from across the country and make lifelong colleagues and friends.

Eligibility Criteria:

- Applicants must be enrolled as matriculated undergraduate or graduate students in a degree program at an accredited college or university.
- Applicants must be in good academic standing.
- Applicants must reside in New York City for the fall and spring sessions. Residency is not required for the summer session.

H RTP Sessions:

Summer Session

Full-Time: Maximum of 35 hours/week for 10-12 weeks

Part-Time: Minimum of 20 hours/week for 10-12 weeks

Fall and Spring Sessions

New York City residency requirement

Part-Time Only: 10-20 hours/week for 10-12 weeks

"H RTP Projects have important educational value for the students who are challenged to attack a real-world problem, collect information in an organized way, analyze the results, and deal with the findings. The H RTP didactic sessions throughout the summer provide a context and background which helps them understand the significance of their work."

-Katherine S. Lobach, M.D., Director
Child Health Clinics of NYC, HHC
