

# Seeking Hookah (Shisha) Smokers for Research Study

The Department of Genetic Medicine at Weill Cornell Medical College is looking for shisha smokers to participate in a research study, looking at the effects shisha may have on the lung cells

**Eligible participants can earn \$250 in compensation upon completion of the following study visits:**

- 1. Screening visit**, including medical history, physical exam, blood and urine tests, EKG, chest X-ray and a breathing test (duration approximately 5 hours):  
\$50 compensation
- 2. Study visit**, including bronchoscopy procedure: \$200 compensation

If you are at least 18 years old and smoke shisha, please call Malesa at **646-962-2672** to hear more about our research study
