

# Dental Students: Boost Your Confidence with Your Hand-Skills

Improve Your Hand-Skills & Visualization Skills  
Over Winter Break at DentSim Lab NYC

**Choose a 2 hour hand-skills course from  
December 20 – January 17, 2013  
Burs and teeth provided**

Practice these skills with on-screen feedback:

- > Drilling to depth
- > Wall angles
- > Outline centralization
- > Assess long axis
- > Outline shape
- > Retention

DentSim Lab NYC offers dental students simulation technology to practice hand-skills & visualization skills with a mannequin, plastic teeth and computer-assisted feedback in real-time. Practice cavity preparation at your pace, at your level to enhance your psychomotor skills. Professors believe that a student's performance improves when they can visualize the tooth in their mind.

**Where:** DentSim Lab NYC, 19 W. 34<sup>th</sup> St., Suite 804, N.Y., N.Y., 10001  
Across from the Empire State Building. Close to subway and mass transit, including PATH, Metro-North and Amtrak services.
