Memorial Sloan Kettering  
Cancer Alliance

For over 130 years, the people of MSK have been pioneers in our focus on the prevention and cure of cancer. Today, MSK is the nation's number one hospital in cancer care (U.S. News & World Report, 2014-15) because of our unified commitment to the people we serve.

The Strategy and Innovation team leverages the power of data and analytics to shape strategic decisions at MSK. Our team has close relationships with senior executives, clinicians, and front-line staff, with whom we work closely to make the results of our analyses practical and usable.

A key institutional initiative that the Strategy and Innovation team supports is the MSK Cancer Alliance.
