October 25th, 2017
4:00-5:30P EDT

To register, please visit medicine.hofstra.edu

A reminder will be sent to all registrants one week prior to the webcast

We believe that diversity in health care will also help to address the many health disparities witnessed in underserved and minority communities. To us diversity is not an end goal, but a means to achieving core educational goals as defined by our medical school. As such, diversity serves as a driver of educational excellence and a mechanism for graduating physicians that contribute to health care equity for all and is consistent with our institutional mission.
